Digital ID Authentication	✓	-	-

Input Documents

Users should be able to include a new document in the system regardless of their location and whenever they deem it necessary, whether on a business trip or at home.

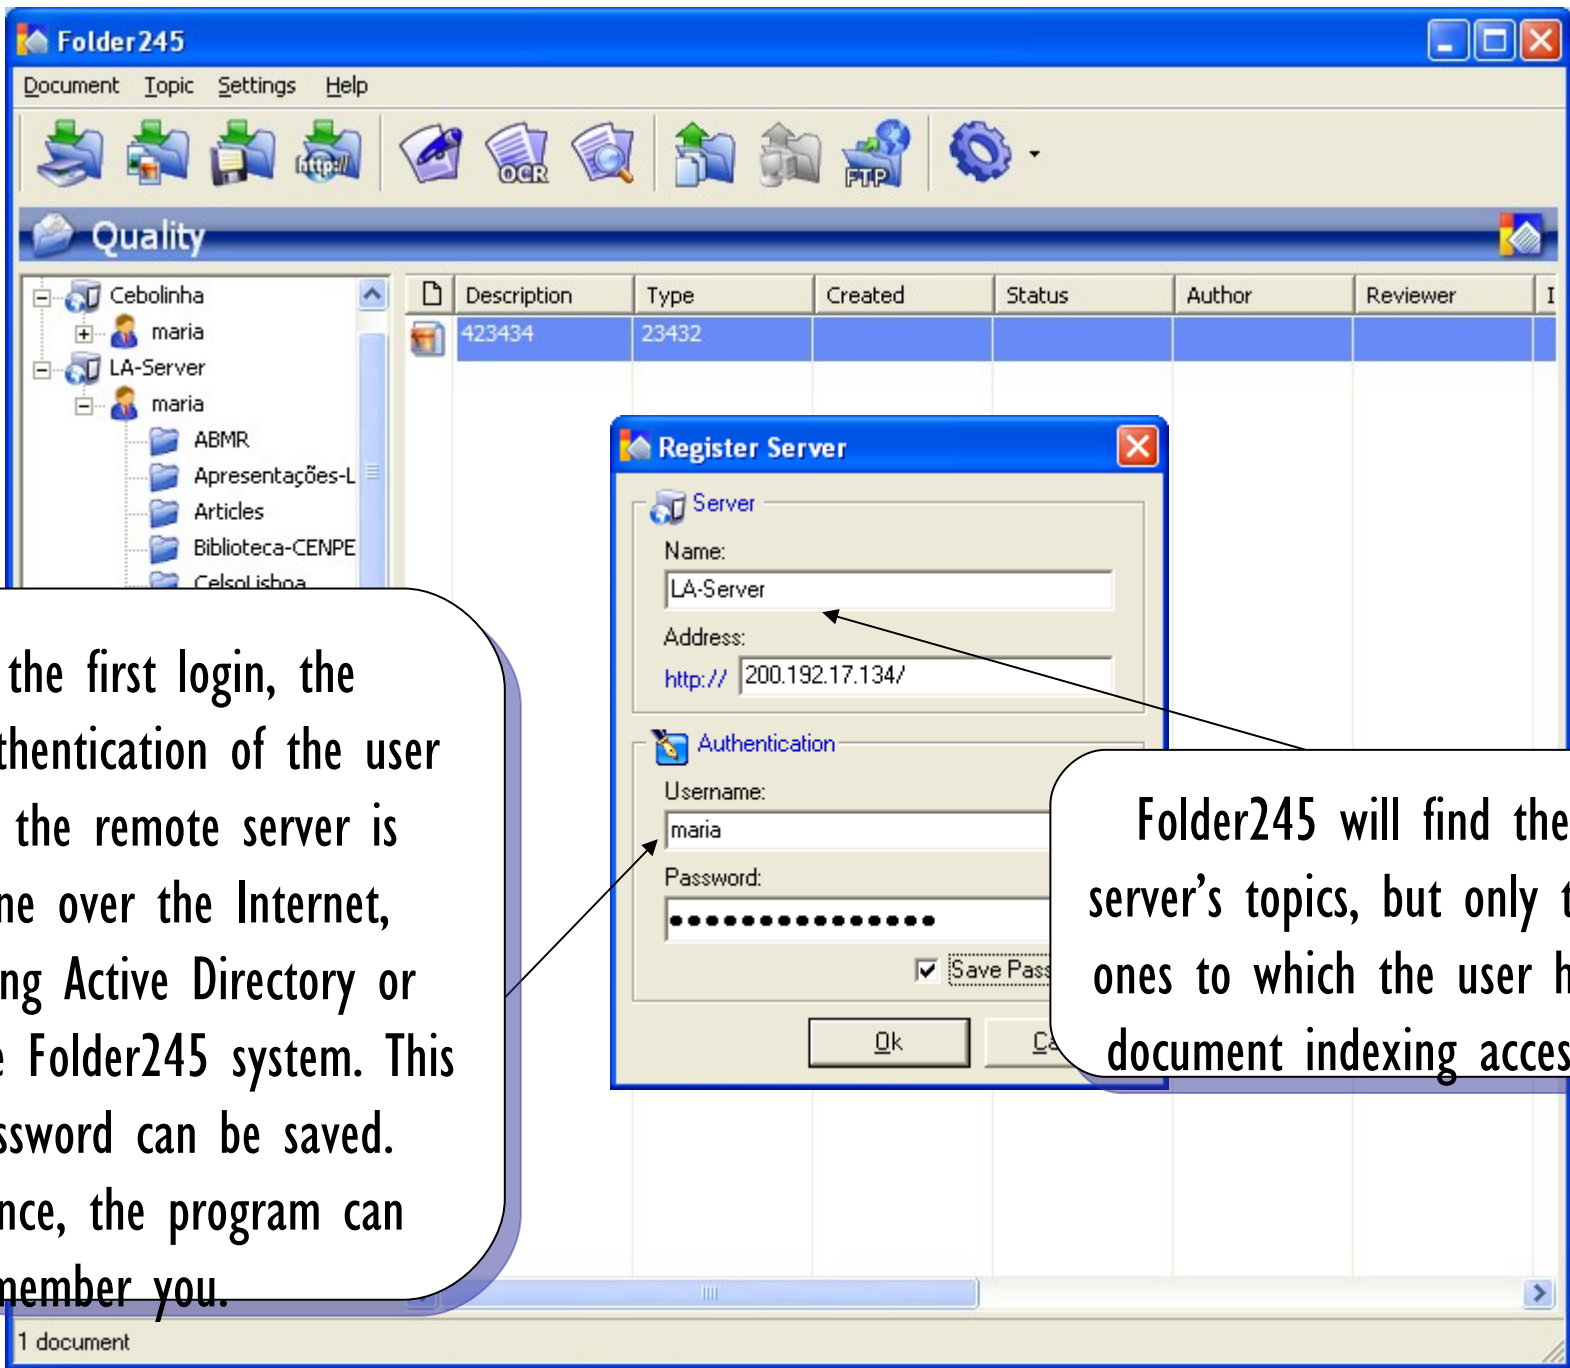

The goal of Folder245 is to make it easy to index documents.

A document can be a scanned sheet of paper, a Word document, a Power Point presentation, a Web page, a video, a picture, etc.

Electronic documents can be indexed using Folder245Plus interfaces or through a “drag and drop” operation over Folder245Drag’s icon.

When you drag and drop the document to Folder245Drag’s icon or when you click on the right button of the mouse and select “send to Folder245Drag”, an indexing window is shown and, once filled, it is closed and the document is sent over the Internet to the server.

The integration with the MSOffice environment is very easy for people who work creating documents.

At the first login, the authentication of the user on the remote server is done over the Internet, using Active Directory or the Folder245 system. This password can be saved. Hence, the program can remember you.

Folder245 will find the server's topics, but only the ones to which the user has document indexing access.

Indexing a URL

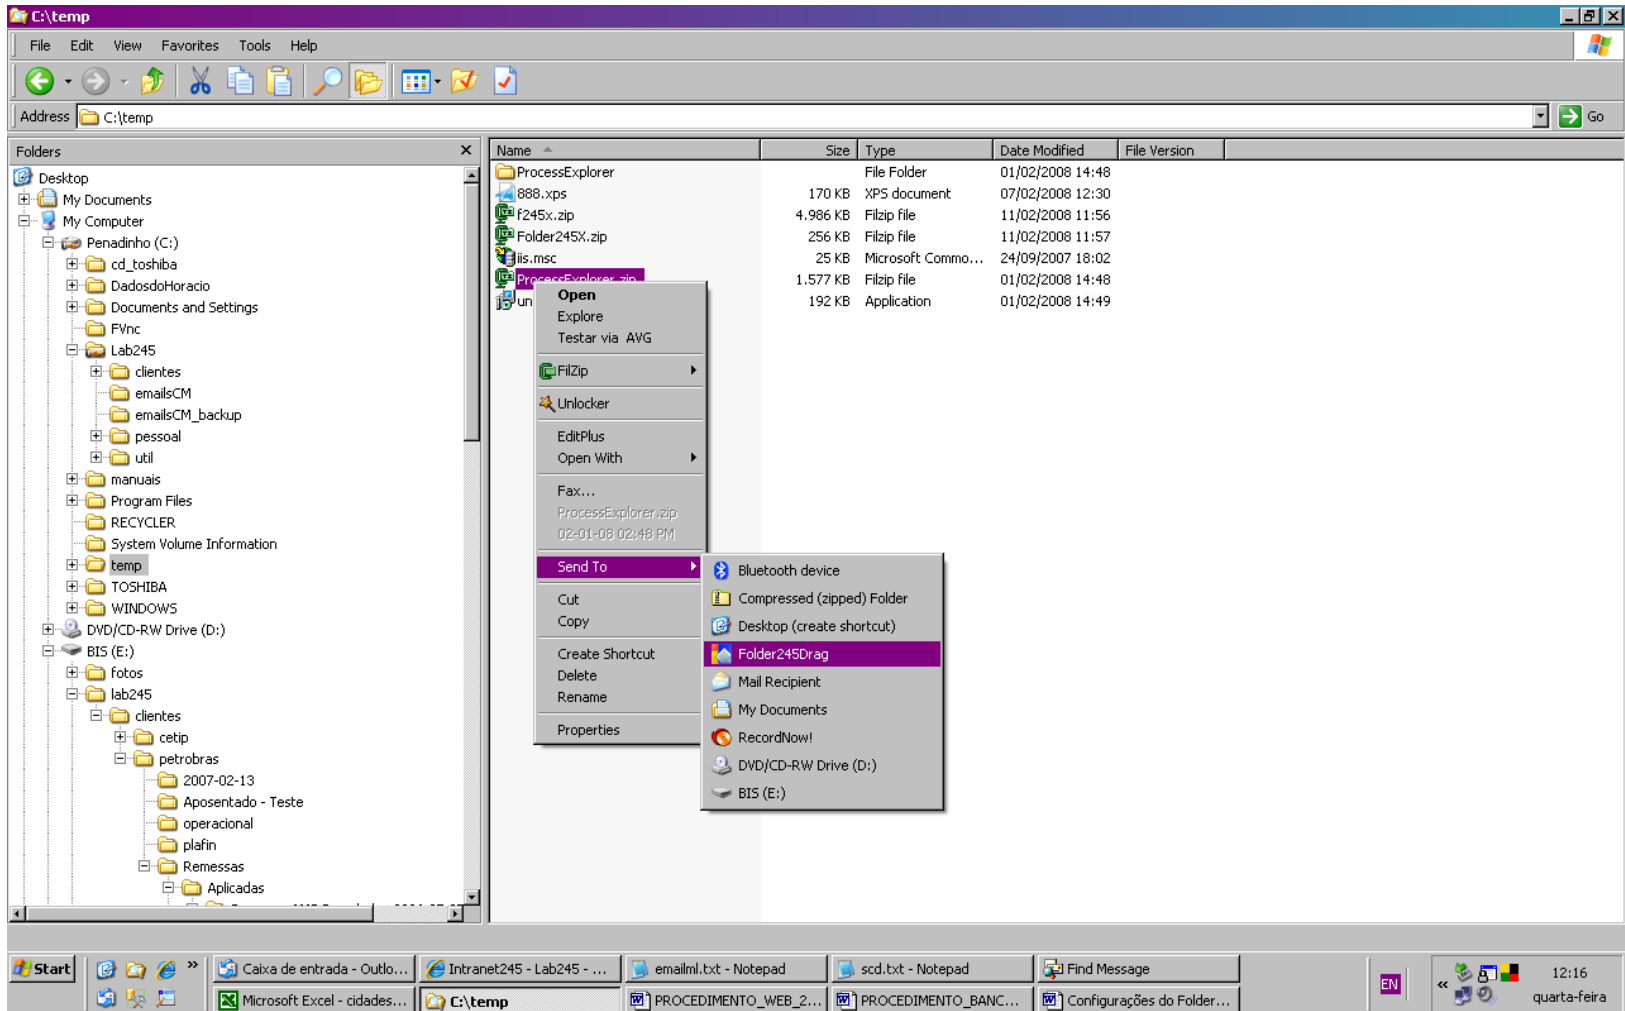

The screenshot shows the Folder245 application interface. The main window displays a table with the following data:

Evento	Pessoas	Data	Comentários	Login	Local Address
Site Jurídico	UOL	2008-01-20			F3.htm

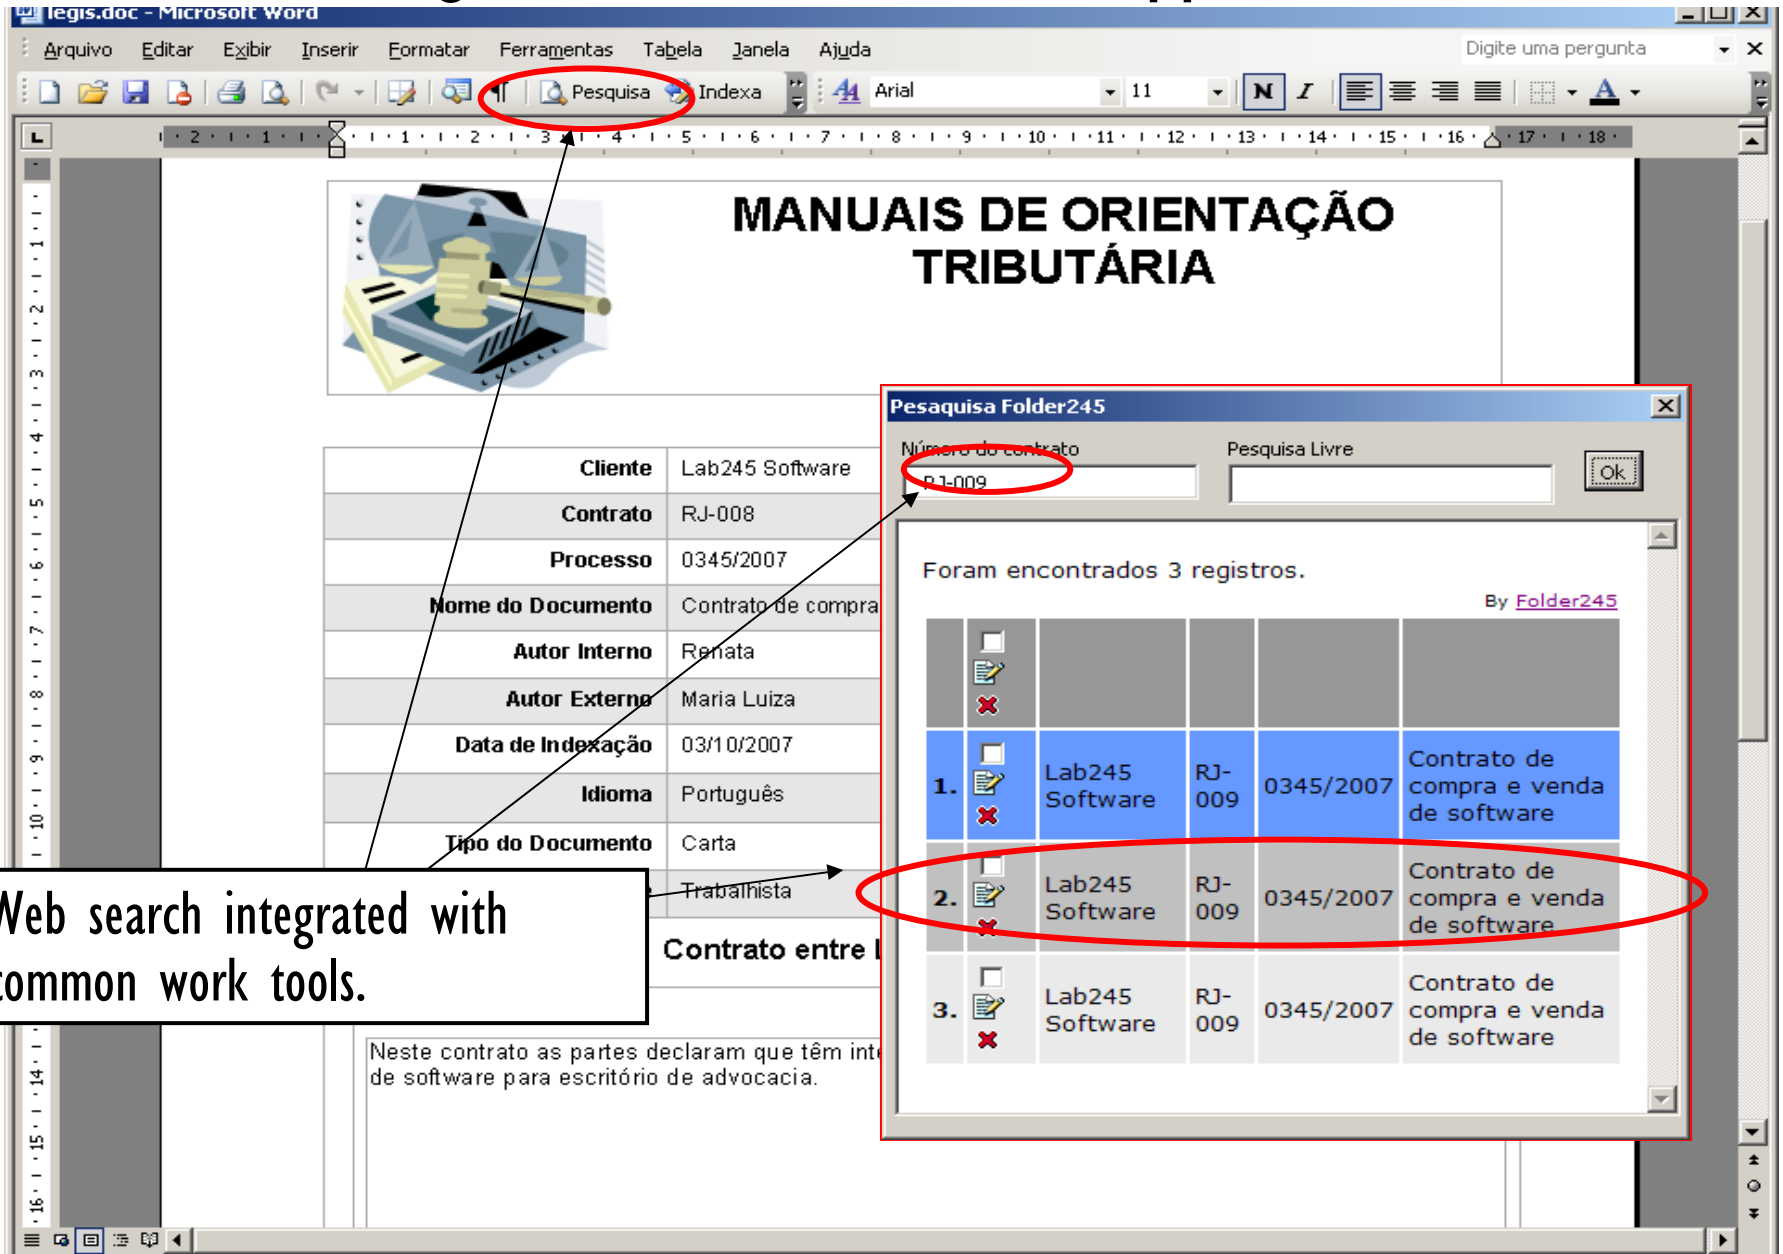

A dialog box titled "URL" is open, showing a text input field with the URL "http://www.uj.com.br/". The dialog box has "OK" and "Close" buttons.

The Folder245 interface includes a menu bar (Document, Topic, Settings, Help), a toolbar with various icons, and a left sidebar showing a tree view of folders and files. The status bar at the bottom indicates "1 document".

“Drag’n Drop” and “Sent to” for easy electronic file input.

Integration with Document Applications

The screenshot shows a Microsoft Word document titled "legis.doc" with a menu bar in Portuguese. The document content includes a title "MANUAIS DE ORIENTAÇÃO TRIBUTÁRIA" and a table with contract details. A search dialog box titled "Pesquisa Folder245" is open, showing search results for the contract number "RJ-009".

Document Content:

Integration and indexing using Microsoft Office

Button to Index Web Pages in PDF format

The image shows a screenshot of a Windows Internet Explorer browser window displaying the website 'Willkommen bei der Hanseatic Bank Hamburg'. The address bar shows 'http://www.hanseaticbank.de/'. The browser's menu bar includes 'Arquivo', 'Editar', 'Exibir', 'Favoritos', 'Ferramentas', 'Ajuda', and a 'Lab245 ToolBar' with an 'Indexar Página' button. A callout box points to this button, stating: 'Folder245Tool Bar: prints in PDF and indexes the image of a web page using Folder245Drag!'. Below the browser window, an Adobe Reader window is open, displaying the same website content. A 'Folder245Drag - Indexar' dialog box is also visible, showing options for 'Data de Destino' and 'Tópico', and a 'Indexar' button.
